Skills & Certifications

- **Technical:** Python, Java, JavaScript, React, PHP, SQL, RPGLE, Azure OpenAI, Azure Databricks, Bash, PowerShell
- **Certifications:** AWS Certified: Cloud Practitioner - CLF-02 (2025), Microsoft Certified: Azure Fundamentals – AZ-900 (2023), Microsoft Certified: AI Fundamentals - AI-900 (2023), Information Technology Security Python (2021), Microsoft Introduction to Programming Using Java (2021), FCC Responsive Web Design (2019)

Experience

Associate Technical Engineer Finastra

June 2024 - Present
Full Time

- Ranked 1st in CL/RPG, SQL, and case-handling probation training and consistently achieved 120% of KPI targets.
- Won two hackathon awards, including for developing a front-end/API solution that improved API throughput by 1000% through optimized request handling and effective use of IBM tools and applications.
- Led programming for a global generative AI initiative, leveraging Python, React, and AI/ML techniques to improve user experience; the solution was integrated into a core company product and fully automated part of the workflow.
- Resolved complex client issues by developing SQL queries and CL/RPG programs, troubleshooting Java code, and performing root-cause analysis in Agile-style meetings with clients.

Automation & Development Intern CGI

October 2023 – March 2024
Internship

- Developed an AI-driven text classification chatbot using Flask, React, TypeScript, and Python, applying Data Science and Machine Learning best practices and optimizing models with Scikit-learn and Keras.

Cloud Engineering Intern Finastra

May 2023 – August 2023
Internship

- Remediated Qualys-identified vulnerabilities, including CISA KEV findings, across Linux and Windows systems using Bash and PowerShell; provisioned and maintained Azure Virtual Machines.
- Developed Power BI reports with Pareto charts to prioritize security issues; and built a Python-based Excel data-cleansing script that reduced dashboard update time by about 30%.

Web & Database Developer Orohealth Inc.

January 2022 – April 2023
Contractual

- Replatformed the company website from Joomla to WordPress, improving UI and maintainability; developed database-backed features including RBAC, transaction tracking, and data visualizations using HTML, CSS, JavaScript, PHP, and SQL; and diagnosed and resolved website issues.

Projects

AIAssist Finastra

Lead Developer

- Built a Python-based text-classification and prompt-engineering solution using OpenAI API, Azure OpenAI, and SFDC data to support clients and internal teams across multiple products; developed a React front end for demonstration and fully automated case report generation.

RapidAPI Finastra

UI Developer

- Developed the front end and API communication flow for a hackathon project using React and SoapUI; researched IBM tools and functionalities to optimize API processes, improving throughput by up to 1000% based on SoapUI testing.

Education

Far Eastern University Institute of Technology

Bachelor of Science in Computer Science with Specialization in Software Engineering

Manila, PH

February 2024
